

Spray Works
LONDON

Accident Repair Centre

"I recently had a repair completed by Sprayworks. The price was competitive and the work exemplary, I can see no faults and the repair was completed ahead of schedule. I would highly recommend this shop and although I hope not to need any further repairs in the future, I would go back!"

Rebecca, Limehouse

Expert Accident Repair Centre in London'

At Sprayworks we are passionate in providing a cost-effective, friendly, honest, and reliable service for all our customers. Our team of experienced technicians ensure work is completed to the highest standard, which is why we're certified members of CARSQA adhering to British Standards: BS 10125.

We know how important it is to keep vehicles on the road. Our City-based body shop provides fast, convenient, and value for money services. All work is carried out by highly trained competent engineers, with the correct equipment and tools to complete the work to time and budget, all while maintaining quality standards.

"Work done to extremely high standard at a reasonable price. They're honest and keep you updated constantly throughout. Would definitely recommend to anyone looking for some body work on their car."

*"I had my whole car sprayed, they did a brilliant job.
It was all finished a day earlier, and the work was done to a
brilliant standard."*

A British Standard Body Shop

At Sprayworks we adhere to British Standard: BS 10125. This is an industry wide standard for vehicle damage repair carried out by body shops, service centres and mobile repair services. It is the industry agreed technical specification for the process of vehicle body repairs.

BS 10125 was developed to recognise the most modern and progressive body shops within the industry who value safe and technically sound repair.

Throughout early 2022, CARSQA as a UKAS accredited body, completed the Third-Party Certification Audit. This means that we at Sprayworks have undergone a stringent multi-layered audit to assess and review the technology, environmental, and political advances required to achieve the certification. We have implemented ADAS, powertrain electrification and vehicle connectivity, therefore ensuring compliance and alignment with the four cornerstones of the BS 10125 – Man, Method, Machine and Materials.

Kevin Porter Managing Director of CARSQA commented "Attaining the BS 10125 Certification is a testament to the business management, innovation and investment strategy of Sprayworks – they are focussed on the future of 'Vehicle Body Repairs'. As an independent body shop, they have demonstrated the forward mindset needed to achieve the Certification to BS 10125.

The British Standard requires competent personnel, appropriate and well-maintained equipment, suitable repair methods and quality repair materials. By achieving this Sprayworks has committed to a culture of continual improvement, providing excellence in customer care and quality of service."

We're proud to be able to call ourselves certified members of CARSQA. Our processes, competent staff, and investment helps to ensure our customer vehicles are repaired to industry guidelines and we're pleased to have this recognised.

Why Sprayworks?

Quality of service

Sprayworks is constantly building a reputation of exceptional customer care. We take great pride in the quality of our service always delivering to high standards. We always go that extra mile to nurture and build relationships with our customers.

Competent staff

Our highly trained technicians and engineers understand vehicles, so you can be sure the repair work is in the best hands. Our people maintain the highest standards of training, knowledge, and skills to ensure all work is completed quickly and efficiently. We hold City & Guilds certification for a wide range of Bodyshop related training from Vehicle Damage Assessment to Paint Competence.

Independent

Sprayworks is a friendly independent body shop, we offer a competitive pricing structure, and provide a personal and bespoke service. Choosing Spray Works means you are supporting local business.

'Would recommend highly as Spray Works are very professional, friendly, very quick and reliable and did a efficient job'

Josh, Bethnal Green

Environmentally aware

We are aware the impact certain materials can have on the environment and the impact this can have on our future. At Sprayworks we're committed to doing protecting our environment. Our waste is collected by regulated organisations, we only use the best water-based paint, and ensure regular servicing and testing on all our emissions to meet British standards.

Industry technology

We use dealership approved software to ensure our pricing is within recognised industry standards. Our in-house system maps the journey the vehicle has taken from the moment it's on our site to when it leaves our care. The customer receives regular updates and is updated regularly throughout the process.

Accredited

We are a proud CARSQA accredited body shop and our mission is to always provide you with the highest quality of repairs.

"I recently had a repair completed by Sprayworks. The price was competitive and the work exemplary, I can see no faults and the repair was completed ahead of schedule. I would highly recommend this shop and although I hope not to need any further repairs in the future, I would go back!"

Ali, Stoke Newington

'...one of the best services I have received over the last 22 years...'

Mario, Head of Fleet & After Sales - We Flex

We Flex, one of the largest PCO/Uber lease companies that provides a variety of vehicles to their network of drivers have been using Sprayworks to support their over 2000 vehicle strong fleet for several years.

Mario, Head of Fleet & Aftersales commented *'Spraysworks offer one of the best services I have received over the last 22 years of working in main dealerships and flagship sites. Not only do Sprayworks take care of my off-road fleet with all the body shop needs, they are my main partner garage taking care of all my vehicles on road and with dealers, providing a range of services from accident management, maintenance, and small repairs.*

We regularly use the collect and delivery service offered by Sprayworks to ensure that our vehicles are back on the road as soon as possible. Having fleets based in both London and

Milton Keynes means that Sprayworks liaises directly with We Flex's diverse range of clients to ensure direct and efficient services meet all their needs. Sprayworks provides a professional repair standard and fantastic customer service, along with the latest technology and skilled labour force. They are always available to offer help and guidance from the smallest repairs to the largest more in-depth accident management which is paramount for my client's needs.

Sprayworks have supported the switch over from standard petrol, Diesel, or hybrid models to full EV for over a quarter of our fleet, providing a fast and efficient service every time.

I would not hesitate to continue using Sprayworks moving forward and would highly recommend them to sales, service and fleet managers who need efficient, hassle free support with their vehicles'

Our Services

At Sprayworks we understand how inconvenient it can be to have a vehicle off the road for any length of time. We provide a comprehensive accident management solution, from roadside support to returning the vehicle to you in a restored state.

SMART repair - Whether it be a few scratches, scuffs, or stone chips minor cosmetic damage can not only spoil the look of a vehicle, but it can also lower its value. Where traditional body shops may need to remove entire panels of the car to repair them, at Sprayworks we use SMART repair techniques. SMART repair is the process of repairing a small area of the vehicle to make it look new again, without replacing a whole panel. All work is prepared in our professional body shop environment with spray booths and ovens. This will often result in a faster and less expensive alternative to traditional body shops.

Alloy wheel refurb - At Sprayworks, we can restore vehicle alloy wheels to their original condition. Our team can repair scratches, scuffing, and chips. We use roadworthy techniques including the use of computer-controlled lathe and rolling machine to re-machine and re-roll wheels.

Our specialised service includes using specific tools for diamond cut designs for alloy wheels. This ensures that wheels have a perfectly smooth finish, completing the overall look of the vehicle.

Dent repair - We use Paintless Dent Repair (PDR), a cost-effective alternative to conventional repair processes. This means dents are not just filled or covered; they are completely removed. PDR guarantees a lower dent removal price and faster completion rate – saving you time and money.

Scratch and scuff removal - We specialise in small repair work which means we know how to keep costs down by focusing on what needs to be repaired rather than respraying entire panels or large sections of a vehicle. Our technicians quickly and effectively eliminate most of the blemishes that are common including scratches and stone chips on bumpers, bonnets, door panels and boot lids.

Detailing – Detailing is a complex, and intensive cleaning and restoring process of a vehicle's exterior components. At Sprayworks we offer a three-tiered approach to detailing dependant on need and condition of the vehicle. We also provide paint protection services. Get in touch for more details.
